

## SETTING UP APPLICATION ENVIRONMENT

Date	30 Oct 2022
Team ID	PNT2022TMID42344
Project Name	CUSTOMER CARE REGISTRY

### FLASK SETUP:

The screenshot shows the PyCharm IDE with a project named 'HelloWorld'. The file 'main.py' is open, containing the following Python code:

```
1 # Importing flask module in the project is mandatory
2 from flask import Flask
3 app = Flask(__name__)
4 # The route() function of the Flask class is a decorator,
5 @app.route('/')
6 # '/' URL is bound with hello_world() function.
7 def hello_world():
8     return 'Hello World'
9 # main driver function
10 if __name__ == '__main__':
11     # run() method of Flask class runs the application
12     # on the local development server.
13     app.run()
```

The Run console at the bottom shows the execution output:

```
C:\Users\ariha\PycharmProjects\HelloWorld\venv\Scripts\python.exe C:/Users/ariha/PycharmProjects/HelloWorld/main.py
* Serving Flask app 'main'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
